Prizes for the High School.

The booksellers of this city, with a praise, worthy liberality, have offerd the following prizes to the pupils of the High School:

Messrs. Moseley & Brother offer to the young gentlemen of the school a book, worth from five to eight dollars, for the best declamation, and Messrs. Newell & Dearborn a book, of the same value, to the young ladies, for the best composition.

These prizes are to be awarded by a committee, at the end of the next term, which will be in April. They will have, we doubt not, a beneficial effect upon the whole school, and it would be well if prizes could be competed for in other branches taught in the High School. For instance to the best scholar in grammar, arithmetic, geometry, history, &c. We think no one could invest a small sum, which would do more good than by thus inciting the pupils of our schools to excel in their studies. It is not the attainment of the prize alone which would be sought, but the honor of being first in their studies would stimulate many to greater exertion.

We think the ward schools would also be benefited by an offer of prizes for proficiency. There should be sufficient local pride, in each ward, to induce some citizen to propose a reward for diligence, good conduct, punctuality, or advancement in studies.—It is no small credit to a ward to have the best school in the city. Let some of our public spirited citizens in the different wards think of this.

Circuit Court.—The second week of the term of this court closed Saturday evening. We are informed that 228 cases have been tried or disposed of for the term. The court reached Saturday evening, No. 205 of the calendar of jury cases. There are still remaining on the docket over 300 cases, besides the criminal docket.

The Wisconsin Farmer, for December, is a very interesting number. Every farmer in the state should have it. It costs only a dollar for a year, and as the new year is just about to commence, now is a good time to subscribe. Powers & Hoyt, publishers, Madison.

☞ The Milwaukee Wisconsin of Saturday says:—In the "money market" we have nothing special to remark. Currency continues in fair supply and in good demand for the provision trade. Exchange is firm and unchanged, at 1½ per cent on the Atlantic cities.

☞ The new bridge at Oregon, Ill., across Rock river, cost $28,000. The citizens subscribed $14,000, $6,000 was raised by tax, and the county board of supervisors appropriated $8,000. Its length is 964 feet, the width 21 feet. It rests upon five stone piers built upon piles driven into the bed of the stream.

A Suggestion to the Members of the Legislature.—The Revised Statutes, chapter seven, section sixty-four, provide that the clerks of the boards of supervisors of the several counties shall "transmit by mail, to the secretary of state, within thirty days after any general election, a list of names of persons elected in the county as members of the senate and assembly."

We would suggest to the members elect that they give their personal attention to the matter, and see that the clerks attend to this duty, and as an additional security, that they obtain a copy of such certificate and bring it with them. In many of the counties, the clerks are exceedingly remiss and prone to all sorts of blunders as the election returns at the recent canvass, as well as last spring, sufficiently show. It is therefore a matter of prudence for each member elect to bring with him the official evidence of his election.—*Madison Journal.*

A Sensible View.—The Charleston correspondent of the Cincinnati Commercial closes one of his letters thus:

Virginia has done her part toward making John Brown a historic character, and giving him a conspicuous niche in the gallery of illustrious traitors. Her military foolery has done more to exaggerate the importance of the wild old man, than all the ding-dongs of the northern fanatics. *If it had been the object of the ruling spirits in Virginia to make John Brown's gallows glorious like the cross*, as Emerson impiously and foolishly said, she was doing the *right thing*, in hiding the gallows with bayonets that the world might not hear his dying words, and in testifying to his significance, by parading at his feet the pomp of an army. We have not heard the last of John Brown, though it would be better if the subject could be dropped, for it has not seemed profitable.

Every where from the south, comes up the cry enough. But *Old Brown's* ghost, Banquo-like will not "*down*" at their "bidding."

We have more illustrations of the extent to which the sacred right of freedom of speech is tolerated by the southern slavery-ites.

A Mr. Fish, of Savannah, Georgia, a respectable slavedealer, and a resident of that city for several years, but born in Massachusetts, has been tarred and feathered for the expression of a sentiment unfavorable to slavery.

In the same place, the "tar and feather" democracy recently caught a shoemaker, who had dared to say a word or two favorable to suffering humanity, and administered to his body a thorough coating of their principles.

James C. Gardner, a zealous democrat, formerly of Jackson county, Ind., is in prison in Martinsburgh, Virginia, on the charge of being an abolitionist and a spy. He was on his way to Washington to procure a land warrant.

The Louisville Democrat of a late date says: "We learn by a private dispatch from Frankfort, Kentucky, that one Caudy, and another man by the name of Fees, abolition brethren, from Jackson, who were holding a protracted meeting near London, Laurel county, were tarred and feathered last Monday. Their heads were shaved, hot tar poured over them, and then feathers were applied."

Among the barbarians of Asia or the Cannibals of the South Sea Islands such savage cruelty would not surprise us.

There is not a paper in the Union sustaining the administration of Buchanan, except those which are the direct recipients of its patronage. The office holders make a hollow show of adulation, but as soon as the next nomination is made, these rats will leave the sinking ship.—*Louisville Journal.*

The Empire of God.—Prof. Mitchell, in closing his series of lectures on astronomy, said: "Now my friends, I must close this long course of lectures. We have passed from planet to planet, from sun to sun, from system to system. We have reached beyond the limits of this mighty stellar cluster with which we are allied. We have found other island universes sweeping through space. The great unfinished problem still remains whence came the universe? Have all these stars which glitter in the heavens been shining from all eternity? Has our globe been rolling around the sun for ceaseless ages? Whence, whence this magnificent architecture, whose architrave rises in splendor before us in every direction? Is it all the work of chance? I answer no; it is not the work of chance. Who shall reveal to us the true cosmography of the universe by which we are surrounded? Is it the work of an Omnipotent architect?

"Around us and above us rise sun and system, cluster and universe. And I doubt not that in every region of this vast empire of God hymns of praise and anthems of glory are rising and reverbrating from sun to sun, and from system to system—heard by Omnipotence alone across immensity and through eternity."

The Bayfield Press, of November 26th, says the fish are coming into the bay, and the fishermen are taking them and barreling them for shipping early in the spring. There are now about three hundred nets at work in the bay. All that the men have to do is to walk from their houses down to the deep water, about half a mile from shore, and drop their nets and take others up, which sometimes contain barrels. Early last spring barrels of these fish were sold at $8. The editor of the Press saw a trout that weighed 25 pounds, and this was small in comparison with some that are taken.

The St. Paul Pioneer describes Bayfield as follows:

"Bayfield, sheltered behind the Apostle Islands, is certainly as delightful a place to spend a quiet summer as the country anywhere affords. It is situated on one of the most beautiful spots along all the picturesque shores of Lake Superior."

Narrow Escape from a Singular Accident.—A young lady who was riding into St. Louis in a carriage, the other morning, came near being the victim of a serious accident. A heated brick had been placed in the bottom of the vehicle to keep her feet warm, but it was so hot that her clothing caught fire, and before reaching the city a large space of her dress and was burned away. There was luckily no blaze, nor a chance for a draft to create one, otherwise the person of the lady would have been badly burned. As there are many people traveling just now, with the same appliance for keeping warm feet, we caution them against the danger above mentioned.

An Immense Iceberg.—Capt. Kirby, of the ship Uncowah, arrived at San Francisco from New York, reports that he passed an immense floating island of ice, about fifty miles south of Cape Horn, on the 9th of August. It was eight to ten miles long, and very high, a solid mass of ice, against which the sea broke as upon the iron-bound shores of a continent. At four miles distant the water about the ship was agitated with eddies and ripples, caused by the opposing presence of so large a body to the usual ocean currents. The sides along which the ship passed appeared to be precipitous for more than a hundred feet up from the water, when they broke up towards the peaks in the interior of the island, and down the steeps, the spy-glass showed the existence of great gullies and water courses. When the sun shone full upon the island, it reflected the light with great brilliancy. It was a majestic spectacle.

A Tennessee paper says: "The inauguration of the governor was celebrated by the firing of *minute guns* every *half-hour*."

Non-Explosive Burning Fluid

USED WITH SAFETY & ECONOMY.

The Best in the Market.

Palmer's Drug and Tea Store.

WE have, for several years past dealt largely in BURNING FLUID, and have always, thus far, kept fully *up to the times*, in any improvements made in its manufacture. Nearly a year ago, in an appeal in favor of its more general use, based upon the fact that the raw material from which it is made, is mainly the product of our own farms, we publicly announced that there was, at the temperature at which it is generally used, "no explosive power whatever in Burning Fluid, *as now made by those who understand the business in which they are engaged.* That injury from its use was either the result of gross carelessness, or of undue alarm caused by a belief in its explosive power," &c. Since then we have manufactured and sold thousands of gallons to consumers in this city and vicinity, and if our assumption was an erroneous one, it would undoubtedly have been discovered ere this.

We are prepared to submit our Fluid to any test the public may call for, satisfied that, with ordinary care, *no safer, better or more agreeable light can be produced.* As we are indebted to no traveling "Prof. Green—O!" for the high state of perfection attained by us in its manufacture, we are, as usual, prepared to offer our Fluid at the *LOWEST MARKET FIGURES*, and to guarantee entire satisfaction in its use, or the money refunded.

Fall and Winter Millinery!

To the Ladies of Rock County.

MRS. O'DEA has just received a very large and select stock of splendid goods, purchased by her sister, from *the first Wholesale Houses* in the trade, and not from slop shops or auction rooms, in New York.

Her Hats will be found to consist of the newest and most fashionable styles of the present season; among them the *Maria Steuart* hat, and a fac-simile of the hat which took the first premium at the late National Fair in Chicago.

Mrs. O'Dea will not offend public taste or seek to impose on public credulity by announcing several *thousands of ladies' hats at few cents each*, but she will only say that her hats are made this season of the best and newest materials, and will be sold at *extremely low prices*. An inspection before purchasing elsewhere is respectfully invited.
